

## **Reservoir Street Water Main Improvements Project**

Water main improvement work on Reservoir Street is scheduled to begin on August 6 and is anticipated to be complete by October 31, 2018. The Norton Water/Sewer Department awarded the project to the low bidder, Gravity Construction, Inc. The work consists of replacing the existing water main in Reservoir Street from Elm Street to Mansfield Avenue. The new water main will improve water pressure, flows, and water quality to the surrounding area in Norton. While the work is in progress, residents within and around the project area will be somewhat inconvenienced by the presence of construction equipment and excavations. In addition, Reservoir Street from Elm Street to Mansfield Avenue will be closed to through traffic and only open to emergency vehicles, residents along Reservoir Street, and school buses while construction is in progress. Normal work hours are Monday through Friday from 7:00am to 3:00pm. The Norton Police Department will be onsite monitoring traffic and the Contractor will have message boards and traffic signage in place during construction.

For more information or if you experience a water quality problem lasting more than four hours, please contact the Water/Sewer Department. Our normal working hours are weekdays from 8:30 am to 4:30 pm. Thank you for your patience and cooperation while work is conducted to improve your water system.
